Seeded Defect Log

#	Defect	Output before seeding	Output after seeding	Suggested Correction	Severity
1	You can register with no first name in the text field	A "Cannot leave fields empty" prompt would appear	No prompt would appear	Check to see if all fields are filled in and not left as Null	1
2	You can register if your passwords does not match	A "Passwords do not match" prompt would appear	No prompt would appear	Check to see if the password strings match before registering	1
3	Instagram information doesn't show on Connections Profile.	Instagram information is supposed to show on Connections Profile page.	Instagram information doesn't show on Connections Profile Page anymore.	Create a row in the app and pull the information from the user api to make the instagram row.	2
4	If you enter your LinkedIn username, it does not save in Edit profile	No prompt would appear, but on your profile page the username would change	No prompt would appear, but on your profile page the username wouldn't save	Pass the saved LinkedIn field back to the profile page so it updates	2
5	Picture in connections profile page don't change based off user.	Picture should be unique regarding user's profile	Picture is the same for all of them.	Make an API call to fetch the picture image and post it to the event list page upon calling.	2
6	If you click on your Instagram username, it does not launch the application to that person's profile	No prompt would appear, but it would launch the Instagram application to that person's profile	No prompt would appear, but it wouldn't launch the Instagram application to that person's profile	Pass the saved Instagram field back to the profile page so it updates	2
7	The cancel button saves what you have in the edit profile page	No prompt would appear, but it wouldn't save what you have in the edit profile page	No prompt would appear, but it would save what you have in the edit profile page	Instead of calling the save function on the cancel button press, only call on the save button press	2
8	Clicking on	The page would go	The page goes to	Connect the Logout	2

	"Logout" button takes to Register page	back to login page	Register.	button to reroute to the login page. Also reset the page stack.	
9	Clicking on "Event List" goes to "Network" on the Navigation Tab	It should go to "Event List" Tab	It goes to the "Network" Tab	Reroute the "Event List" Tab	1
10	Clicking on "Network" goes to "Event List" on the Navigation Tab	It should go to "Network" Tab	It goes to the "Event List" Tab	Reroute the Network" Tab	1
11	Clicking on the delete button next to a moderator's name deletes all the moderators on the client	Clicking the delete button next to a username should only delete that user	Delete button removes all users from the client view	Rework logic to delete only the user which appears next to the delete button	3
12	Saving a profile image on edit profile does not save the image	No prompt would appear, but on your profile page the profile image would change	No prompt would appear, but you wouldn't be able to see the new profile image	Make the API call to save the image	3
13	A username can be not unique	A "User already exists" prompt would appear	No prompt would appear	Have a checker to see if the username is already in the database	2
14	Scanning an incorrect QR code on the connect tab does not prompt anything	A "User does not exists" prompt would appear	No prompt would appear	Have a check and prompt the user	3
15	First and Last name are flipped in the profile page in the network connections	First and Last name are not flipped in the profile page in the network connections	First and Last name are flipped in the profile page in the network connections	Place the first name first and then the last name.	1

16	Anyone can add anyone to an event	Only moderators can add users to an event	Any user can add any user to an event.	Have a moderator checker to see if user is moderator before giving option to add users.	
17	If a user is added to an event, they don't get added as a participant or attendee.	When a user is added to an event, they get added in the participants list if they are an attendee.	A user won't get checked in regardless of meeting criteria.	Need to call API for participants to add user to list.	
18	Participants can get checked in even if they are not an attendee of the event.	Outputs "participant scanned" even if user is not an attendee.	Should output "error, user not found as an attendee" and register the scan.	Have a checker method to see if person scanned is part of event before getting checked as a participant.	
19	Logging out of admin panel clears the current data, but does not take user back to login prompt.	Logging out of admin panel should take user back to login prompt	Logging out of admin panel keeps the user in the panel with blank information	Set the authentication state to logged out when the logout button is clicked	2
20	Date is stored and displayed as the previous date from the inputted date	Date should be set as the date that was inputted	Date will be set to the day previous of the one inputted	Set hours parameter of date time string so that it reflects the next date	2
21	If you click on the Facebook username in profile page, it redirects to facebook.com/facebook instead of user's profile page	Supposed to redirect to user's facebook name that they inputted on their profile.	Always redirects to facebook.com/facebook.	When making the api call to facebook, the url should be changed to take in the user's username for facebook instead of just being hardcoded.	1
22	Deleting an event removes it from the database but not the client	Client should remove the event that was removed from view	Event that is removed will remain in the client view even though it is no	Implement logic to delete the event object from the client on the button	2

			longer present in the database	callback	
23	Event organizer can add self as a moderator	Event organizer should be notified that they cannot add themselves as a moderator	Event organizer gets added as a moderator	Check if the event organizer that is logged in is being added as the moderator and display an error message if the user tries to add self as moderator	3
24	Saving an event in edit mode creates a new event	Saving an event in edit mode modifies the current event being edited	Saving an event in edit mode causes a new event to be created	Set the edit state to update and make changes to the current event	1
25	When moderator is added it pushes to the participant and attendee list even if they exist	Adding a moderator does not append to the participants and attendees if they already exist	Adding a moderator adds it to the participants and attendees regardless if they are already there	Add a check to see if the username exists in the participants and attendees arrays	3
